Audit qualifications

There are no qualifications in the audit reports pertaining to the Issuer's annual financial statements for the years ended 2017 and 2018.

What are the key risks that are specific to the Issuer?

Economic and market risks

Competition

There is a risk that the market proves to favour the current or future competitors of the Issuer, that new methods or concepts are being developed by a competitor and/or that the Issuer is being affected by price competition. Such development could have a negative impact on the attractiveness and margin of the Issuer's products which in turn could have a negative impact on the Issuer's results of operations or financial condition.

Technical development and product development

There is a risk that rapid developments in solar cells and technology of the type developed and produced by the Issuer may have a negative impact on the Issuer if the Issuer cannot keep up with its competitors rapid developments in solar cells and technology of the type developed and produced by it. Therefore, it may lead to a negative effect on the value of the Issuer's products, product equipment, product processes, know-how and/or market position.

Risk relating to the Issuer's business

Security of delivery at growth

In the event of a sudden increase of demand, there is a risk that the Issuer cannot fulfil their delivery undertakings sufficiently which could result in deteriorating customer relationships which in turn could have a negative impact on the Issuer's business. If the planned expansion requires more capital than envisaged and/or the liquidity available to the Issuer for such purpose is not sufficient there is a risk that the expansion needs to be reduced or suspended which could have a negative impact on the Issuer's business.

Dependence on suppliers and co-operations

Failure in deliveries and instalments by the Issuer's suppliers and/or to the Issuer co-operated parties' failure to comply with their commitments could have a negative impact on the Issuer's ability to maintain profitability and the ability to meet the increased demand from its customers which could lead to that its customers will favour its competitor's products, which in turn could have a negative impact on the Issuer's business and results of operations.

Financial risks relating to the Issuer

Refinancing risks

Refinancing risk is the risk that financial costs could be higher and/or the refinancing possibilities could be limited or non-existent when the Notes or other debt owed by the Issuer falls due and needs to be refinanced. Adverse economic conditions may, in the longer-term, impair the Issuer's ability to service its payment obligations and/or comply with the debt covenants, which could also have an adverse effect on the Issuer's business, prospects, financial condition, results of operations and cash flows. Additionally, uncertainty in the financial markets may also adversely affect the Issuer's ability to access financing or to refinance existing debt, which could have a negative impact on the Issuer's business and financial condition.

Foreign exchange risk

The Issuer reports in SEK but the majority of the Issuer's sales are, at the time of this Prospectus, made in USD. Also, a significant amount of the material costs and process costs are currently in USD and EUR, which are recalculated to SEK on each payment day. Fluctuations in foreign currency exchange rates could therefore have a negative impact the Issuer's results of operations.

Credit risks

The Issuer's credit risk refers mainly to account receivables. If the Issuer is not successful in managing its credit risks or if its counterparties are unable to pay its debts as they fall due causing a delay, it may have a negative impact on the Issuer's liquidity which could increase the Issuer's financing needs. Further, if the Issuer's counterparty are unable to pay its debt in whole or in part this could have a have a negative impact on the Issuer's results of operations or financial condition.

Legal and regulatory risks relating to the Issuer

Statutes and subsidies

The Issuer is affected by current statutes and policies. Future changes, especially related to "green energy" such as aid, tax reliefs and other forms of policy tools designed to direct demand, may have a negative impact on the on the attractiveness of the Issuer's products, which may in turn have a negative impact on the Issuer's business.

Where will the securities be traded?

The Initial Notes will be admitted to trading at Nasdaq Stockholm or, if such admission to trading is not possible to obtain or maintain, admitted to trading on another Regulated Market.

What are the key risks that are specific to the securities?

Risks relating to the nature of the Notes

Preferential rights of creditors –unsecured obligations

The Notes represent an unsecured obligation of the Issuer. Every investor should be aware that by investing in the Notes, it risks losing the entire, or parts of, its investment in the event of the Issuer's liquidation, bankruptcy or company reorganisation.

Risks relating to debt instrument such as the Notes

European Benchmarks Regulation

The Notes have STIBOR as interest base which is regulated by the Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds and amending Directives 2008/48/EC and 2014/17/EU and Regulation (EU) No 596/2014 (the “**Benchmarks Regulation**”). Since the regulation has only been applicable for a limited period of time, the effects of the regulation cannot be fully assessed. There is a risk that the Benchmarks Regulation (and further guidance in relation to it) may affect how interest rate benchmarks such as STIBOR are calculated and developed.

Risks relating to the admission of the Notes to trading on a regulated market

Secondary market and liquidity risk

The Issuer cannot assure that a liquid trading of the Notes will occur and be maintained. There is a risk that the Notes will not be approved for trading or listing. If the Issuer fails to procure admission to trading or listing, investors will not be able to hold the Notes on an investment savings account (*ISK or IS-konto*). Even if the Notes are admitted to trading or listed on a regulated market, there is a risk that demand for and trading in the Notes will not develop or, if developed, is not sustained. Each of the above, alone or in combination, may result in a Noteholder being unable to sell its Note(s) at a desired time or at a yield which is comparable to similar investments that have an existing and functioning or secondary market.

The risk factors are presented in categories where the most material risk factors in a category is/are presented first under that category. Risks relating to the Issuer

Economic and market risks

Competition

The Issuer is a supplier of turnkey systems for manufacturing of flexible solar cells and panels. There are several operators within the market of solar cells and panels designed to generate electricity who use various types of technologies. Accordingly, there is a risk that the market proves to favour the current or future competitors of the Issuer. There is also a risk that new methods or concepts develop, which may receive more acceptance than those solutions offered by the Issuer.

For example, perovskite solar cells (which is a different technology from the technology used by the Issuer) have recently received a lot of attention and progress in efficiency. Even though that technology is far from mature and field proven, customers might delay purchase decisions in fear of new technology development such as perovskite solar cells. Further, some companies have also developed light weight solar panels based on fragile Si-solar cells. So far they have not captured any significant market and most of those products lack standard safety certifications.

Development/research of such technologies are mainly done on corporate level and normally kept as a well-guarded secret until the day of product launch/introduction and it is therefore not possible to provide predict or describe potential competing technologies more than on a general level. However, if they are able to develop and certify a light weight product based on the cheaper Si-technology (or any other type of technology it could provide price pressure on the Issuer's and the Issuer's customers products which in turn could have a negative impact on the attractiveness and margin of the Issuer's products which could have a negative impact on the Issuer's results of operations or financial condition.

Although the Issuer deems the likelihood of a fast and widespread introductions of the competing technologies as described above (or other technology's than the ones used by the Issuer) to be low, if any of these risks materialise, it may have a material negative impact on the Issuer's business which in turn could have a negative effect on its results of operations.

Further, a financially strong competitor may use price reductions with the purpose of quickly gaining market shares or to establish themselves on the market with similar products as the Issuer. Price competition is particularly likely within the solar cell sector, where technologies different to those marketed by the Issuer may prove to be more economical. If any of these risks materialise, it may have a material negative effect on the Issuer's margin on sold products which in turn could have a negative impact on the Issuer's results of operations or financial condition.

Risk rating: High

Technical development and product development

The Issuer operates in an industry that is characterised by constant and rapid developments in technology, science and know-how. For example, Perovskite tandem solar cells (where a layer of perovskite is placed on top of a Si-solar cell) have proven high efficiency even though it is still in laboratories. There is also some development going on with building integrated photovoltaics (BIPV) where for example Tesla has launched a solar roof where the solar cell replaces traditional ceramic tiles. The future success of the Issuer will depend on the Issuer's ability to adjust to external factors and meet changes in demand from customers by adjusting offers

and developing new and competitive products. Solar cells and the type of technologies developed and produced by the Issuer may be subject to rapid technological development or replaced completely by more efficient technologies. If the Issuer cannot keep up with its competitors rapid developments in solar cells and technology of the type developed and produced by the Issuer it may lead to a negative effect on the value of the Issuer's products, product equipment, product processes, know-how and/or market position. If any of these risks materialise, it could have a negative effect on the Issuer's business which in turn could have a negative impact on the Issuer's results of operations or financial condition.

Risk rating: High

Risk relating to the Issuer's business

Security of delivery at growth

The Issuer is currently in a phase of expansion and plans to continue expanding in the upcoming years. For example, the company's equipment customers are in the initial phase of building up their production facilities and market. Currently, a "standard" factory consists of 8 DUO machines with an annual capacity of 40 MW. Even though 8 machines is currently a large order for the Issuer, the Issuer's view in the longer term is that its customers will not settle for a capacity of 40MW but that they will rather plan to establish gigawatt factories which would require some 200 DUO machines. If such expansion occur it will put stress on the financial conditions of the Issuer as it currently do not have the capacity to produce such volumes without significant additional investments being made. If the Issuer cannot obtain the funds necessary for investments to meet an increased demand of its products, there is a risk that its customers will favour its competitor's products which in turn could have a negative impact on the Issuer's business.

As described above, at the date hereof, the Issuer's ability to produce and deliver production equipment and products is limited. Increased sales and delivery volumes would place high demands on, for example, the internal organisation, suppliers' abilities and the need for working capital. A sudden increase of demand could lead to problems with delivery times and levels of quality. There is a risk that the Issuer cannot fulfil its delivery undertakings sufficiently, which could result in deteriorating customer relationships which in turn could have a negative impact on the Issuer's business.

Further, in the shorter term the Issuer's planned expansion require liquidity to be able to finance such expansion. If the expansion requires more capital than envisaged and/or the liquidity available to the Issuer for such purpose is not sufficient, there is a risk that the expansion needs to be reduced or suspended which could have a negative impact on the Issuer's business.

Risk rating: Medium

Dependence on suppliers and co-operations

The Issuer utilises a number of suppliers who are important to the Issuer's ability to produce products in a sufficient amount and quality, and with sufficient security of delivery. To maintain profitability in each project, the Issuer depends on that ordered products are delivered and installed with sufficient reliability and quality. This is particularly important during the phase of expansion the Issuer is currently in. Should the suppliers fail to deliver and install ordered products, it could have a negative impact on the Issuer's ability to maintain profitability. Failure in deliveries and instalments may also create demands in the future for further extensions in recapitalisations/capital supply by, for example, a rights issue.

The ability for the Issuer's supplier to follow in the future expansion is critical. For example, if the Issuer's customers aim to establish gigawatt factories which would require some 200 DUO machines, the Issuer would be dependent on its suppliers being able to deliverer necessary components, raw materials and other ancillary equipment, components etc. If such suppliers cannot deliverer the quantity or quality in a timely manner, there is a risk that the Issuer will be unable to meet the increased demand from its customers which could lead to that its customers will favour its competitor's products which in turn could have a negative impact on the Issuer's business and result from operations.

An integrated part of the Issuer's operations and business model is to co-operate with various parties within the production-, distribution-, and instalment process. These co-operations are made with parties whom the Issuer considers fulfil the requisite quality requirements to maintain the Issuers demand for quality and security of

delivery. There is a risk that these parties do not fulfil their commitments or that their ability to fulfil their commitments in quality and delivery is limited by external factors. These factors may affect the Issuer's ability to maintain sufficient profitability, which in turn could have a negative impact on the Issuer's results of operations.

Differences in organisational or corporate culture, leadership and organisations could lead to problems with integration of co-operation. The conditions that based the co-operations, such as set goals, committed market shares and the quality and performance of the products, may prove to be wrong. Loss of results may also arise due to unpredicted legal, regulatory or contractual issues. Difficulties in realising operational synergies or failure to maintain the Issuer's usual quality of delivery and service, could also result in a decrease in result. Negative effects could result from co-operations and joint investments that distract the management's attention from the daily business. If any of the risks described above would materialise, it could have a negative impact on the Issuer's business.

Risk rating: Low

Dependence on components and raw material

The Issuer depends on a number of components and raw material for the production of solar cells. For example, the Issuer's main product is a complex piece of equipment dependent on several key components like sputter power supplies, turbo molecular pumps and other vacuum and electrical components. From time to time when there is a boom in the semiconductor equipment market, components like turbo molecular pumps and other components can experience long lead times. These components are difficult to replace. In early 2018 the lead time for turbo molecular pumps increased from 12 to 28 weeks, causing increased lead times or re-design of some parts (and higher cost) of the equipment to host another brand of pump. Another example is non-critical electrical components where a sub-supplier relocated his factory and caused unannounced delays in deliveries causing production halts and re-scheduling in the production of the Issuer's equipment production. There is a risk that situations may arise where certain materials become difficult to obtain or where shortage arise. Supply of inputs and raw materials may for example be limited by political decisions, natural disasters warfare or other extraordinary situations. As a consequence, the current levels of production and deliveries could be difficult to maintain or cease completely, which could have a negative impact on the Issuer's business. Further, if the availability of certain components or raw materials decrease there is a risk that the price of such component or raw material increase which in turn would lead to an increase of the production cost for the Issuer's products, if such risk materialise the margin of the Issuer's sold products could decrease which in turn could have a negative impact on the Issuer's result of operations.

Risk rating: Low

Product liability and guarantees

The Issuer's products are subject to product and warranty liabilities. Suppliers and assemblers generally have limited obligations to replace the Issuer for faulty deliveries or installed products. Replacement claims may be directed towards the Issuer by their customers and of persons who suffer harm in production or use any of the Issuer's products. The Issuer normally demand 18 months warranty from suppliers, so that the Issuer can give 12 months warranty to its customers, allowing for manufacturing and shipping time. However, if production delays occur, components could fall out of suppliers warranty, but still be under Issuer's warranty. Hence, there is a risk that claims are directed directly towards the Issuer and that the Issuer may not be able to receive reimbursement for such claims from any relevant third party. To the extent warranty claims and product liability claims are not covered by the Issuer's insurance or pursuant to which the Issuer cannot direct claims towards third parties, this could have a negative impact on the Issuer's results of operations or financial condition. Should the Issuer suffer damage or receive a claim for reimbursement that is not covered or only partially covered by the insurance, it could lead to increased costs for the Issuer which in turn might have a negative impact on the Issuer's results of operations.

Risk rating: Low

Co-operation with Sunflare Inc.

The Issuer co-operates with the American company Sunflare Inc (“**Sunflare**”), on sales and production on the Chinese and American markets. Sunflare is responsible for financing solar cell factories in Asia and has the main responsibility of mass production of solar cells and flexible solar cell panel solutions. Sunflare is also responsible for sales in China. The Issuer is responsible for process and of production controls in mass production. Sunflare is also responsible for sales of flexible solar cell solutions in the US and OEM collaborations with American companies, where the Issuer’s products are integrated into other manufacturer’s products, or sold under other brands. If any problems occur within the co-operation with Sunflare or if such cooperation is terminated, it could have a negative impact on the Issuer’s ability to sell or maintain its current sales and production on the Chinese and American markets which in turn could lead to a negative impact on the Issuer’s business and/or results of operations.

There is a risk that the co-operation with Sunflare will not proceed as expected, that the terms for such co-operation is materially adversely changed or such cooperation being terminated. Circumstances may arise that make it increasingly difficult for Sunflare to participate, or completely prevent them from participating, in the development and financing of new solar cell factories in China. The construction and financing of solar cell factories in China has made the Sunflare-projects the largest projects yet for the Issuer. They constitute the majority of the Issuer’s earnings and turnover to date. If any of the risks described above would materialise, it could have a negative impact on the Issuer’s access to production in China and the Issuer’s access to the Chinese market which in turn could have a significant negative impact on the Issuer’s turnover and result from operations.

Risk rating: Low

Dependence on personnel

The Issuer is highly dependent on a number of key persons, such as Sven Lindström and Eric Jaremalm. Should one or both of them leave the Issuer, it could delay or impair the future development of the Issuer. It is also essential for the success of the Issuer to attract and keep qualified personnel, or else it could affect the Issuer’s ability to complete the phase of expansion it is currently in. For example, approximately 10 per cent. of the Issuer’s employees are Ph.D.’s who, together with the remaining R&D personnel, are working with improving the quality of the solar cells and developing new types of innovative solar panels. If the Issuer would be unable to retain and/or hire such qualified personnel at reasonable compensation levels, it could also have a negative impact on the Issuer’s costs and ultimately its business.

Risk rating: Low

Financial risks relating to the Issuer

Refinancing risks

Refinancing risk is the risk that financial costs could be higher and/or the refinancing possibilities could be limited or non-existent when the Notes or other debt owed by the Issuer falls due and needs to be refinanced. The final maturity date of the Notes is 25 April 2023, in order for the Issuer to repay the Notes on such final maturity date it must for example have generated enough cash from its business operations to make such repayment, be able to incur new financial indebtedness in an amount sufficient to repay the Notes or otherwise obtain the cash necessary to make such repayment. The obligations under the Notes constitute the vast majority of the financial indebtedness of the Issuer and the possibility to incur additional financial indebtedness is contractually limited by the Terms and Conditions of the Notes (although there are possibilities to incur additional financial indebtedness under certain circumstances).

Adverse economic conditions may, in the longer-term, impair the Issuer’s ability to service its payment obligations and/or comply with the debt covenants, which could also have an adverse effect on the Issuer’s business, prospects, financial condition, results of operations and cash flows. Additionally, uncertainty in the financial markets may also adversely affect the Issuer’s ability to access financing or to refinance existing debt.

Ultimately, if the Issuer is unable to refinance existing financial indebtedness on the relevant due dates it may lead to its creditors taking action against it (for example initiating court proceedings, attachment or filing for

bankruptcy for the Issuer), which in turn could have a negative impact on the Issuer's business and financial condition.

Risk rating: Medium

Foreign exchange risk

Currency risk is the risk that changes in exchange rates will adversely affect the Issuer's cash flow, income statement and balance sheet. The Issuer reports in SEK but the majority of the Issuer's sales are, at the time of this document, made in USD. For example, a 10 per cent. increase of SEK against USD would per 31 December 2018 have led to a change of the equity and result of operations of the Issuer in an amount of SEK -13,7 million. Should USD weaken against SEK there is a risk that the sales of the Issuer in SEK would decrease if the Issuer is unable to make a corresponding increase the price of its sold products. If such risk would materialise, it could have a negative impact on the Issuer's results of operations.

Also, a significant amount of the material costs and process costs are currently in EUR, which are recalculated to SEK on each payment day. Should EUR strengthen towards SEK or USD, it could have a negative impact on the Issuer's results of operations and future need of capital.

In connection with the future development of the Issuer and increased sales on other markets than the Swedish market, a larger portion of the sales may be in other currencies than SEK. Fluctuations in foreign currency exchange rates could therefore have negative impact the Issuer's results of operations.

Risk rating: Low

Credit risks

Credit risk is the risk that a counterparty to a transaction will be unable to fulfil its contractual financial obligations, resulting in a loss for the Issuer. The Issuer's credit risk refers mainly to account receivables. If the Issuer is not successful in managing its credit risks or if its counterparties are unable to pay its debts as they fall due causing a delay, it may have a negative impact on the Issuer's liquidity which could increase the Issuer's financing needs. Further, if the Issuer's counterparty are unable to pay its debt in whole or in part this could have a have a negative impact on the Issuer's results of operations or financial condition.

In particular, the Issuer's strategy to enter into contracts with contract manufacturers imply a financial risk for the Issuer as a contract manufacturer will only make a down payment of approximately 30 per cent. of the purchase price for a DUO machine when placing an order and will pay the residual amount of the purchase price in instalments. If a contract manufacturer (i.e. a third party) becomes insolvent, there is a risk that the Issuer's demand for payment under the contract is not fulfilled. If the contract manufacturer does not have sufficient liquidity to fulfil its obligations under the contract with the Issuer, this could have a negative impact on the Issuer's business or results of operations.

Risk rating: Low

Trade tariffs, custom duties and trade barriers

The Issuer is affected by current trade tariffs, custom duties and trade barriers. For the Issuer the markets in China and the US are important and the potential new and/or increased trade barriers imposed on solar panels produced in China and exported to the US could lead to a general downturn in the market for solar panels which could lead to a decrease in the demand of the Issuer's products. Future changes in current trade tariffs, custom duties and trade barriers may therefore have a negative impact on the Issuer's opportunity to production in, and/or sales to, countries abroad (primarily being China and the US). Also, new or increased trade tariffs, custom duties and trade barriers might cause a delay in customer purchase decision even though the underlying demand is still unchanged. New or increased trade tariffs, custom duties and trade barriers might cause customers to move factories to other territories and thus causing the delay but it is in the Issuer's opinion more likely that e.g. China is more focused on stimulating unique technologies and companies wanting to start production in China.

A change in current trade tariffs, custom duties and trade barriers may therefore negatively affect the Issuer's ability to pursue with its business in different markets. Further, future changes in current trade tariffs, custom

duties and trade barriers may also have negative impact on the price and/or availability of critical supplies and products necessary for the Issuer's and its customers' business, which in turn may lead to an increase in the Issuer's production costs or its customers' ability to purchase its products which in turn could have a negative impact on the Issuer's business and results of operations.

Risk rating: Low

Risks related to covenants in debt documents

The Issuer's debt levels, debt service obligations and compliance with related covenants could have important consequences for the Issuer, including the following:

- its financial and operational flexibility in planning for, or responding to, changes in the Issuer's business and industry could be limited;
- its ability to fund internal growth through working capital and capital expenditure and for other general corporate purposes could be limited;
- its ability to obtain additional financing in the longer term, including its ability to refinance its bank borrowings on comparable terms, or at all, could be limited;
- its ability to exploit business opportunities or make acquisitions or investments could be restricted; and
- in the event of a downturn in revenue, its leverage could have a disproportionately adverse effect on its profitability,

each of which, alone or in combination, could have a material adverse effect on the Issuer's ability to pursue its current expansion and the ability to seize future business opportunities which in turn could have a negative effect on the business.

Risk rating: Low

Interest rate risks

Interest rate risk is the risk that changes in market interest rates will have a negative impact on the net profit, cash flow or the fair values of financial assets and liabilities. For example, the Issuer's level of debt creates an exposure to interest rate risk where an increase in the interest rates on its debt obligations would lead to higher financing costs. Currently, the vast majority of the Issuer's financial indebtedness consist of the indebtedness incurred under the Notes. For example, a change of the interest rate with +/- 1 per cent. during the coming twelve month period would have an impact of approximately +/- SEK 2 million on the Issuer's interest income/expense. If such risk would materialise, this could have a negative impact on the Issuer's results of operations or financial condition.

Risk rating: Low

Legal and regulatory risks relating to the Issuer

Statutes and subsidies

The Issuer is affected by current statutes and policies, particularly different forms of policy tools that benefit investments in "green energy". Certain forms of energy (such as solar energy) may be subject to various aids or subsidies and future changes in aid, tax reliefs and other forms of policy tools designed to direct demand to other energy sources than solar energy, or a reduction of current actions favouring solar energy, may have negative impact on the Issuer's development. For example, policies in feed-in tariffs can suddenly change which happened in Spain during 2008. Similarly there has been debate in Sweden regarding the investment grant of 20-30% currently available for photovoltaics (PV) installations in Sweden. This level has dropped from 60% when it was first introduced in 2009 and the budget has been increased with a certain lag due to higher interest from the public than anticipated. Such changes in policies, subsidies etc. could have a sudden and short term impact on the Issuer's business as certain incentives for its customers, and its customers customers, may decrease.

Further, if other types of technologies or methods than those marketed by the Issuer and its partners are subject to aid or subsidies it may have impact on the attractiveness of the Issuer's products, which may in turn have a negative impact on the Issuer's business.

Risk rating: Medium

Risks related to labels and certifications

The Issuer's products are subject to mandatory and voluntary labelling and certification. The Issuer's solar panels are for example certified by Kiwa according to IEC 61646 and IEC 61730, by Underwriters Laboratories Inc. (UL) according to UL1703 and are CE-marked. The UL certification is a requirement for the US market and *inter alia* entail that the Issuer's solar panels is eligible to be installed on industrial roofs in areas in California which are deemed to be high risk for forest fire. In addition, different standards of industry and certificates must be complied with. The Issuer must therefore establish technical documentation of the products and guarantee that the products comply with the requirements to receive the relevant certificates and labels. Although the Issuer follows standards and conduct third party evaluations regarding labelling and certification, if the Issuer cannot comply with the requirements to obtain or maintain the relevant labels or certificates, it could restrict and/or prohibit the Issuer's ability to sell its products on certain markets (such as the US market) and/or, expose the Issuer to potential liability for sale of unlabelled or uncertified products, which in turn could have a negative impact on its business and results of operations.

Risk rating: Low

EU General Data Protection Regulation

The Issuer handles personal data within its ordinary course of business, for example in relation to employees and customers. The European Union's regulation (EU) 2016/679 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data (the "GDPR") includes new requirements for processing of personal data. To comply with the GDPR, the Issuer has been obliged to implement new data processing policies and dedicate a significant amount of time to ensure compliance with the GDPR. This may create challenges for the Issuer, as it will need to ensure that its policies and procedures are compliant with the GDPR at all time. Failure to comply with the GDPR exposes the Issuer to substantial monetary fines which could have a negative impact on the Issuer's results of operations.

Risk rating: Low

Risks relating to the Notes

Risks relating to the nature of the Notes

Preferential rights of creditors –unsecured obligations

The Notes represent an unsecured obligation of the Issuer. This means that in the event of the Issuer's liquidation, company reorganisation, bankruptcy or other insolvency proceedings the Noteholders normally receive payment after any prioritised creditors, including those which are mandatorily preferred by law, have been fully paid. Further, following prioritised creditors receiving payment in full, the Noteholders will have an unsecured claim against the Issuer for the amounts due under or in respect of the Notes, which means that the Noteholders normally would receive payment *pro rata* with other unsecured creditors. Every investor should be aware that by investing in the Notes, the risk of losing the entire, or parts of, its investment in the event of the Issuer's liquidation, bankruptcy or company reorganisation will be higher should there be prioritised or other unsecured creditors with claims on the Issuer.

Risk rating: Medium

Risks relating to the admission of the Notes to trading on a regulated market

Secondary market and liquidity risk

The Issuer cannot assure that a liquid trading of the Notes will occur and be maintained. The Issuer will apply for admission to trading and listing of the Notes at Nasdaq Stockholm, or, if such admission to trading is not possible to obtain or maintain, for admission to trading or listing on another regulated market after the SFSA approves a prospectus for this purpose. However, there is a risk that the Notes will not be approved for trading or listing. If the Issuer fails to procure admission to trading or listing, investors will not be able to hold the Notes on an investment savings account (*ISK* or *IS-konto*), thus affecting such investor's tax situation, and/or the Notes may not be a suitable investment for some investor e.g. due to that they are not compatible with the investment objectives of the relevant investor. Even if the Notes are admitted to trading or listed on a regulated market, there is a risk that demand for and trading in the Notes will not develop or, if developed, is not sustained.

Each of the above, alone or in combination, may result in a Noteholder being unable to sell its Note(s) at a desired time (or at all) or at a yield which is comparable to similar investments that have an existing and functioning or secondary market. This means that a Noteholder may be exposed to the risks related to the Issuer until the Notes reach the maturity date and the lack of liquidity in the market may have a negative impact on the market value of the Notes.

Risk rating: Medium

Risks relating to debt instrument such as the Notes

European Benchmarks Regulation

The Notes have STIBOR as interest base. STIBOR constitutes a benchmark according to the Regulation (EU) 2016/1011 of the European Parliament and of the Council of 8 June 2016 on indices used as benchmarks in financial instruments and financial contracts or to measure the performance of investment funds and amending Directives 2008/48/EC and 2014/17/EU and Regulation (EU) No 596/2014 (the "Benchmarks Regulation") which entered into force 1 January 2018. The Benchmarks Regulation regulates the provision of a benchmark, contribution of input data for the purpose of determining a benchmark and the operation of benchmarks within the EU. Since the regulation has only been applicable for a limited period of time, the effects of the regulation cannot be fully assessed. There is, however, a risk that the Benchmarks Regulation (and further guidance in relation to it) may affect how interest rate benchmarks such as STIBOR are calculated and developed. This in turn may give rise to increased volatility for some interest rate benchmarks such as STIBOR. In addition, the increased administrative requirements and the associated regulatory risks may decrease the will of some parties to participate in the determination of interest rate benchmarks such as STIBOR or to the fact that certain interest rate benchmarks will cease to be published. If this is the case for STIBOR, and e.g. the relevant fall-back solution evident from the Terms and Conditions should not work properly or negatively for either or both of the Issuer or the Noteholders, this may e.g. lead to difficulties with determining and calculating interest which in turn could lead to costly and time consuming discussions (and maybe even disputes) in respect of the matter, which in each case could have an adverse effect on the Notes, the Issuer and/or the Noteholders.

See further in Clause 10.3 of the Terms and Conditions.

Early redemption due to illegality (call option)

“Change of Control Event” means, in relation to shares of the Issuer, an event or series of events resulting in (a) one or more persons acting together, acquire control over the Issuer and where “control” means (A) acquiring or controlling, directly or indirectly, more than fifty (50) per cent. of the voting shares of the Issuer, or (B) the right to, directly or indirectly, appoint or remove the whole or a majority of the members of the board of directors of the Issuer, or (b) the Issuer at any time becomes delisted from Nasdaq First North or a Regulated Market.

DESCRIPTION OF THE ISSUER

Introduction and business overview

The Issuer was founded in 2004 and has its registered office and production facility in Järfälla, Sweden. The Issuer has developed a technology for the production of lightweight, flexible solar cells and panels, and its major clients are based in USA and China which are the largest solar power markets.

The Issuer's ambition is to transform the solar panel market, from a supply of bulky, rigid, heavy panels with glass and aluminium frames, to a market with cleverly designed lightweight, thin, flexible solar solutions fully integrated into roofs, vehicles and other surfaces.

Summary of the Issuer's history and development

2004	The Issuer was founded by Sven Lindström, Alf Linder, Eric Jaremalm and Göran Lombäck.
2006	The Issuer became coordinator of a three-year EU project to develop the cadmium free CIGS thin film sputtering process.
2009	As a result of the financial crisis, the Issuer shifted from a focus on producing solar cells to produce and sell the manufacturing systems.
2013	The Issuer's revenue more than doubled from FY12 and received a major order from Poland for a solar cell production line.
2014	The Issuer worked with several multinational corporations to develop building-integrated solar panels
2015	The Issuer sold 6 DUO machines and a large-scale installation of flexible solar cell modules were done at Tele2 Arena in Stockholm.
2016	The Issuer secured a full order book for 2017 and delivered two DUO machines.
2017	The Issuer doubled revenue and launched new building integrated solar panels.
2018	Midsummer AB was listed on Nasdaq First North on 21 June 2018 and had a record order intake of SEK 265m

Business areas

The Issuer's operations consist of the following three business areas (i) supplier of DUO machines, (ii) sales of lightweight flexible solar panels and (iii) service and process support for DUO machines.

Supplier of DUO machines

The DUO machine is a compact, all-vacuum, fully automatic deposition system for lightweight, flexible solar cell manufacturing. The system is designed for high throughput, operational stability, optimized layer uniformity and superior material utilization. The system can produce 5 MW or 50,000 m² of solar cells per year, and the price for one DUO Turnkey System is between USD 3.5-5.0m depending on configuration.

The Issuer has today the capacity of producing around twenty machines per year.

Sales of lightweight flexible solar panels

The Issuer's final products are lightweight flexible panels made up of 156×156 mm cells. The panels can be used on numerous applications, such as membrane roofs, Building Integrated Photovoltaics (BIPV), landfill covers among others.

The Issuer will begin an in-house panel production during 2019.

Service and process support for the DUO machines

The Issuer supplies process support with every DUO system delivered. The Issuer's staff is, in many cases overlooking the production at customers. The Issuer's service and support agreements are profitable parts of the standard sales contract.

Material trends, uncertainties, demands and commitments

The Issuer's ambition is to transform the solar panel market, from a supply of bulky, rigid, heavy panels with glass and aluminium frames, to a market with cleverly designed lightweight, thin, flexible solar power solutions fully integrated into roofs, vehicles and other surfaces.

The solar cell market has seen a rapid growth the last twenty (20) years. However, 95 per cent. of the market consists of crystalline silicon panels which are made of glass, are heavy and require racks for installation, which limits the areas of use.¹ According to the Issuer, the Issuer's lightweight, flexible solar panels can be used in several areas where silicon panels cannot, hence considered the only commercially viable solution going forward. Membrane roofs and rooftops to villas are good examples where, in its opinion, the Issuer's solar panels have unmatched competitive advantages. Another competitive advantage is that it has solved the equation of how to mass produce lightweight, flexible solar cells while competitors have struggled.

As of today, the Issuer's lightweight, flexible solar cells represent less than 0.1 per cent. of the total solar cell market.²

The transition to renewable energy sources is necessary to limit the emissions of greenhouse gases, which contribute to climate change and thereby pose a great threat to the environment. Solar energy is an important source of energy going forward, and according to WBGU (*German advisory council on global change*) it is the only long-term solution as the world's energy consumption is expected to increase by 28 per cent. between 2015 and 2040.³

The Issuer's production releases approximately 15 per cent. of the CO₂ emissions generated by traditional silicon cell production and uses no environmentally hazardous, toxic elements such as cadmium. The Issuer's technology admits for local manufacturing of solar cells, which not only creates high tech jobs where the end product is demanded, but also admits for a know-how and technology transfer of green technology.⁴

As a result of the cooperation with Sunflare Inc, the Issuer has accomplished a fast market establishment and presence in the two largest solar panel markets in the world, USA and China, which as of today is where the Issuer's major clients are based.⁵

The Issuer has reported strong revenue growth the last five years, and has since 2015 increased its revenue from SEK 32,000,000 to SEK 244,000,000.

If no such rate is available, the most recently published rate shall be used instead.

1.2.4 A notice shall be deemed to be sent by way of press release if it is made available to the public within Sweden promptly and in a non-discriminatory manner.

1.2.5 No delay or omission of the Agent or of any Noteholder to exercise any right or remedy under the Finance Documents shall impair or operate as a waiver of any such right or remedy.

2. STATUS OF THE NOTES

2.1 The Notes are denominated in Swedish Kronor and each Note is constituted by these Terms and Conditions. The Issuer undertakes to make payments in relation to the Notes and to comply with these Terms and Conditions.

2.2 By subscribing for Notes, each initial Noteholder agrees that the Notes shall benefit from and be subject to the Finance Documents and by acquiring Notes, each subsequent Noteholder confirms such agreement.

2.3 The nominal amount of each Initial Note is SEK 1,000,000 (the “**Nominal Amount**”). The maximum aggregate nominal amount of the Initial Notes as at the First Issue Date is SEK 200,000,000. All Initial Notes are issued on a fully paid basis at an issue price of 100 per cent. of the Nominal Amount.

2.4 Provided that (i) no Event of Default is continuing or would result from the expiry of a grace period, the giving of a notice, the making of any determination (or any combination of the foregoing) or from the relevant issue of Subsequent Notes and (ii) the Incurrence Test is met, the Issuer may, on one or several occasions provided that the Issuer meets the Incurrence Test, issue Subsequent Notes. Subsequent Notes shall benefit from and be subject to the Finance Documents, and, for the avoidance of doubt, the ISIN, the interest rate, the currency, the nominal amount and the final maturity applicable to the Initial Notes shall apply to Subsequent Notes. The issue price of the Subsequent Notes may be set at the Nominal Amount, a discount or a premium compared to the Nominal Amount. The maximum aggregate nominal amount of the Notes (the Initial Notes and all Subsequent Notes) may not exceed SEK 500,000,000 unless a consent from the Noteholders is obtained in accordance with Clause 16.4.2(a). Each Subsequent Note shall entitle its holder to Interest in accordance with Clause 9.1, and otherwise have the same rights as the Initial Notes.

2.5 The Notes constitute direct, general, unconditional, unsubordinated and unsecured obligations of the Issuer and shall at all times rank *pari passu* and without any preference among them and at least

pari passu with all other direct, unconditional, unsubordinated and unsecured obligations of the Issuer, except obligations which are preferred by mandatory regulation and except as otherwise provided in the Finance Documents.

- 2.6 The Notes are freely transferable but the Noteholders may be subject to purchase or transfer restrictions with regard to the Notes, as applicable, under local regulation to which a Noteholder may be subject. Each Noteholder must ensure compliance with such restrictions at its own cost and expense.
- 2.7 No action is being taken in any jurisdiction that would or is intended to permit a public offering of the Notes or the possession, circulation or distribution of any document or other material relating to the Issuer or the Notes in any jurisdiction other than Sweden, where action for that purpose is required and as such the Notes have not been and will not be registered, and may be restricted, in United States, Australia, Japan, Canada, or in any other country where the offering, sale and delivery of the Notes may be restricted by law. Each Noteholder must inform itself about, and observe, any applicable restrictions to the transfer of material relating to the Issuer or the Notes.

When the Agent is satisfied that it has received the conditions precedent for disbursement set out in Clause 5.2 above, the Agent shall instruct the Account Bank to transfer the funds from the Escrow Account in accordance with the Disbursement Notice.

- 5.4 The Agent does not review the documents and evidence referred to in Clause 5.2 from a legal or commercial perspective of the Noteholders. The Agent may assume that the documentation delivered to it pursuant to Clause 5.2 is accurate, legally valid, enforceable, correct, true and complete unless it has actual knowledge that this is not the case, and the Agent does not have to verify the contents of any such documentation.

- 17.3 The Agent shall promptly notify the Noteholders of any amendments or waivers made in accordance with Clause 17.1, setting out the date from which the amendment or waiver will be effective, and ensure that any amendments to the Finance Documents are published in the manner stipulated in Clause 11.4 (*Availability of Finance Documents*). The Issuer shall ensure that any amendments to the Finance Documents are duly registered with the CSD and each other relevant organisation or authority.
- 17.4 An amendment to the Finance Documents shall take effect on the date determined by the Noteholders Meeting, in the Written Procedure or by the Agent, as the case may be.

18. THE AGENT

18.1 Appointment of the Agent

- 18.1.1 By subscribing for Notes, each initial Noteholder appoints the Agent to act as its agent in all matters relating to the Notes and the Finance Documents, and authorises the Agent to act on its behalf (without first having to obtain its consent, unless such consent is specifically required by these Terms and Conditions) in any legal or arbitration proceedings relating to the Notes held by such Noteholder, including the winding-up, dissolution, liquidation, company reorganisation (*företagsrekonstruktion*) or bankruptcy (*konkurs*) (or its equivalent in any other jurisdiction) of the Issuer. By acquiring Notes, each subsequent Noteholder confirms such appointment and authorisation for the Agent to act on its behalf.
- 18.1.2 Each Noteholder shall immediately upon request provide the Agent with any such documents, including a written power of attorney (in form and substance satisfactory to the Agent), that the Agent deems necessary for the purpose of exercising its rights and/or carrying out its duties under the Finance Documents. The Agent is under no obligation to represent a Noteholder which does not comply with such request.
- 18.1.3 The Issuer shall promptly upon request provide the Agent with any documents and other assistance (in form and substance satisfactory to the Agent), that the Agent deems necessary for the purpose of exercising its rights and/or carrying out its duties under the Finance Documents.
- 18.1.4 The Agent is entitled to fees for all its work in such capacity and to be indemnified for costs, losses and liabilities on the terms set out in the Finance Documents and the Agency Agreement and the

Agent's obligations as Agent under the Finance Documents are conditioned upon the due payment of such fees and indemnifications.

- 18.1.5 The Agent may act as agent or trustee for several issues of securities issued by or relating to the Issuer and other Group Companies notwithstanding potential conflicts of interest.

18.2 Duties of the Agent

- 18.2.1 The Agent shall represent the Noteholders in accordance with the Finance Documents, including, *inter alia*, holding the Security created pursuant to the Escrow Account Pledge Agreement on behalf of the Noteholders and, where relevant, enforcing the Security created under the Escrow Account Pledge Agreement on behalf of the Noteholders.
- 18.2.2 When acting pursuant to the Finance Documents, the Agent is always acting with binding effect on behalf of the Noteholders. The Agent is never acting as an advisor to the Noteholders or the Issuer. Any advice or opinion from the Agent does not bind the Noteholders or the Issuer. The Agent is not responsible for the content, valid execution, legal validity, perfection or enforceability of the Finance Documents.
- 18.2.3 When acting pursuant to the Finance Documents, the Agent shall carry out its duties with reasonable care and skill in a proficient and professional manner.
- 18.2.4 The Agent shall treat all Noteholders equally and, when acting pursuant to the Finance Documents, act with regard only to the interests of the Noteholders as a group and shall not be required to have regard to the interests or to act upon or comply with any direction or request of any other person, other than as explicitly stated in the Finance Documents.
- 18.2.5 The Agent is always entitled to delegate its duties to other professional parties and to engage external experts when carrying out its duties as agent, without having to first obtain any consent from the Noteholders or the Issuer. The Agent shall however remain liable for any actions of such parties if such parties are performing duties of the Agent under the Finance Documents.
- 18.2.6 The Issuer shall on demand by the Agent pay all costs for external experts engaged by it (i) after the occurrence of an Event of Default, (ii) for the purpose of investigating or considering (A) an event or circumstance which the Agent reasonably believes is or may lead to an Event of Default or (B) a matter relating to the Issuer or the Finance Documents which the Agent reasonably believes may be detrimental to the interests of the Noteholders under the Finance Documents, and (iii) in connection with any Noteholders' Meeting or Written Procedure, or (iv) in connection with any amendment (whether contemplated by the Finance Documents or not) or waiver under the Finance Documents. Any compensation for damages or other recoveries received by the Agent from external experts engaged by it for the purpose of carrying out its duties under the Finance Documents shall be distributed in accordance with Clause 15 (*Distribution of proceeds*).
- 18.2.7 The Agent shall, as applicable, enter into agreements with the CSD, and comply with such agreement and the CSD Regulations applicable to the Agent, as may be necessary in order for the Agent to carry out its duties under the Finance Documents.
- 18.2.8 Other than as specifically set out in the Finance Documents, the Agent shall not be obliged to monitor (i) whether any Event of Default has occurred, (ii) the performance, default or any breach by the Issuer or any other party of its obligations under the Finance Documents, or (iii) whether any other event specified in any Finance Document has occurred. Should the Agent not receive such information, the Agent is entitled to assume that no such event or circumstance exists or can be expected to occur, provided that the Agent does not have actual knowledge of such event or circumstance.

- 18.2.9 Notwithstanding any other provision of the Finance Documents to the contrary, the Agent is not obliged to do or omit to do anything if it would or might in its reasonable opinion constitute a breach of any regulation.
- 18.2.10 If in the Agent's reasonable opinion the cost, loss or liability which it may incur (including reasonable fees to the Agent) in complying with instructions of the Noteholders, or taking any action at its own initiative, will not be covered by the Issuer or the Noteholders (as applicable), the Agent may refrain from acting in accordance with such instructions, or taking such action, until it has received such funding or indemnities (or adequate Security has been provided therefore) as it may reasonably require.
- 18.2.11 The Agent shall give a notice to the Noteholders (i) before it ceases to perform its obligations under the Finance Documents by reason of the non-payment by the Issuer of any fee or indemnity due to the Agent under the Finance Documents or the Agency Agreement or (ii) if it refrains from acting for any reason described in Clause 18.2.10.

18.3 Liability for the Agent

- 18.3.1 The Agent will not be liable to the Noteholders for damage or loss caused by any action taken or omitted by it under or in connection with any Finance Document, unless directly caused by its negligence or wilful misconduct. The Agent shall never be responsible for indirect or consequential loss.
- 18.3.2 The Agent shall not be considered to have acted negligently if it has acted in accordance with advice from or opinions of reputable external experts provided to the Agent or if the Agent has acted with reasonable care in a situation when the Agent considers that it is detrimental to the interests of the Noteholders to delay the action in order to first obtain instructions from the Noteholders.
- 18.3.3 The Agent shall not be liable for any delay (or any related consequences) in crediting an account with an amount required pursuant to the Finance Documents to be paid by the Agent to the Noteholders, provided that the Agent has taken all necessary steps as soon as reasonably practicable to comply with the regulations or operating procedures of any recognised clearing or settlement system used by the Agent for that purpose.
- 18.3.4 The Agent shall have no liability to the Issuer or the Noteholders for damage caused by the Agent acting in accordance with instructions of the Noteholders given in accordance with the Finance Documents.
- 18.3.5 Any liability towards the Issuer which is incurred by the Agent in acting under, or in relation to, the Finance Documents shall not be subject to set-off against the obligations of the Issuer to the Noteholders under the Finance Documents.

18.4 Replacement of the Agent

- 18.4.1 Subject to Clause 18.4.6, the Agent may resign by giving notice to the Issuer and the Noteholders, in which case the Noteholders shall appoint a successor Agent at a Noteholders' Meeting convened by the retiring Agent or by way of Written Procedure initiated by the retiring Agent.
- 18.4.2 Subject to Clause 18.4.6, if the Agent is Insolvent, the Agent shall be deemed to resign as Agent and the Issuer shall within ten (10) Business Days appoint a successor Agent which shall be an independent financial institution or other reputable company which regularly acts as agent under debt issuances.
- 18.4.3 A Noteholder (or Noteholders) representing at least ten (10) per cent. of the Adjusted Nominal Amount may, by notice to the Issuer (such notice shall, if given by several Noteholders, be given by them jointly), require that a Noteholders' Meeting is held for the purpose of dismissing the Agent and appointing a new Agent. The Issuer may, at a Noteholders' Meeting convened by it or by way

of Written Procedure initiated by it, propose to the Noteholders that the Agent be dismissed and a new Agent appointed.

- 18.4.4 If the Noteholders have not appointed a successor Agent within ninety (90) days after (i) the earlier of the notice of resignation was given or the resignation otherwise took place or (ii) the Agent was dismissed through a decision by the Noteholders, the Issuer shall within thirty (30) days thereafter appoint a successor Agent which shall be an independent financial institution or other reputable company.
- 18.4.5 The retiring Agent shall, at its own cost, make available to the successor Agent such documents and records and provide such assistance as the successor Agent may reasonably request for the purposes of performing its functions as Agent under the Finance Documents.
- 18.4.6 The Agent's resignation or dismissal shall only take effect upon the appointment of a successor Agent and acceptance by such successor Agent of such appointment and the execution of all necessary documentation to effectively substitute the retiring Agent.
- 18.4.7 Upon the appointment of a successor, the retiring Agent shall be discharged from any further obligation in respect of the Finance Documents but shall remain entitled to the benefit of the Finance Documents and remain liable under the Finance Documents in respect of any action which it took or failed to take whilst acting as Agent. Its successor, the Issuer and each of the Noteholders shall have the same rights and obligations amongst themselves under the Finance Documents as they would have had if such successor had been the original Agent.
- 18.4.8 In the event that there is a change of the Agent in accordance with this Clause 18.4, the Issuer shall execute such documents and take such actions as the new Agent may reasonably require for the purpose of vesting in such new Agent the rights, powers and obligation of the Agent and releasing the retiring Agent from its further obligations under the Finance Documents and the Agency Agreement. Unless the Issuer and the new Agent agree otherwise, the new Agent shall be entitled to the same fees and the same indemnities as the retiring Agent.

19. THE ISSUING AGENT

- 19.1 The Issuer shall when necessary appoint an Issuing Agent to manage certain specified tasks under these Terms and Conditions and in accordance with the legislation, rules and regulations applicable to and/or issued by the CSD and relating to the Notes. The Issuing Agent shall be a commercial bank or securities institution approved by the CSD.
- 19.2 The Issuing Agent may retire from its assignment or be dismissed by the Issuer, provided that the Issuer has approved that a commercial bank or securities institution approved by the CSD accedes as new Issuing Agent at the same time as the old Issuing Agent retires or is dismissed. If the Issuing Agent is Insolvent, the Issuer shall immediately appoint a new Issuing Agent, which shall replace the old Issuing Agent as issuing agent in accordance with these Terms and Conditions.
- 19.3 The Issuer shall ensure that the Issuing Agent enters into agreements with the CSD, and comply with such agreement and the CSD Regulations applicable to the Issuing Agent, as may be necessary in order for the Issuing Agent to carry out its duties relating to the Notes.
- 19.4 The Issuing Agent will not be liable to the Noteholders for damage or loss caused by any action taken or omitted by it under or in connection with any Finance Document, unless directly caused by its negligence or wilful misconduct. The Issuing Agent shall never be responsible for indirect or consequential loss.

20. THE CSD

- 20.1 The Issuer has appointed the CSD to manage certain tasks under these Terms and Conditions and in accordance with the CSD Regulations and the other regulations applicable to the Notes.
- 20.2 The CSD may retire from its assignment or be dismissed by the Issuer, provided that the Issuer has effectively appointed a replacement CSD that accedes as CSD at the same time as the old CSD retires or is dismissed and provided also that the replacement does not have a negative effect on any Noteholder or the admission to trading of the Notes on the Regulated Market. The replacing CSD must be authorised to professionally conduct clearing operations pursuant to the Swedish Securities Markets Act (*lag (2007:528) om värdepappersmarknaden*) and be authorised as a central securities depository in accordance with the Financial Instruments Accounts Act.

21. NO DIRECT ACTIONS BY NOTEHOLDERS

- 21.1 A Noteholder may not take any steps whatsoever against the Issuer to enforce or recover any amount due or owing to it pursuant to the Finance Documents, or to initiate, support or procure the winding-up, dissolution, liquidation, company reorganisation (*företagsrekonstruktion*) or bankruptcy (*konkurs*) (or its equivalent in any other jurisdiction) of the Issuer in relation to any of the obligations and liabilities of the Issuer under the Finance Documents. Such steps may only be taken by the Agent.
- 21.2 Clause 21.1 shall not apply if the Agent has been instructed by the Noteholders in accordance with the Finance Documents to take certain actions but fails for any reason to take, or is unable to take (for any reason other than a failure by a Noteholder to provide documents in accordance with Clause 18.1.2), such actions within a reasonable period of time and such failure or inability is continuing. However, if the failure to take certain actions is caused by the non-payment of any fee or indemnity due to the Agent under the Finance Documents or the Agency Agreement or by any reason described in Clause 18.2.10, such failure must continue for at least forty (40) Business Days after notice pursuant to Clause 18.2.11 before a Noteholder may take any action referred to in Clause 21.1.
- 21.3 The provisions of Clause 20.1 shall not in any way limit an individual Noteholder's right to claim and enforce payments which are due to it under Clause 10.5 (*Mandatory repurchase due to a Change of Control Event or an Admission to Trading Failure Event (put option)*) or other payments which are due by the Issuer to some but not all Noteholders.

22. PRESCRIPTION

- 22.1 The right to receive repayment of the principal of the Notes shall be prescribed and become void ten (10) years from the Redemption Date. The right to receive payment of interest (excluding any capitalised interest) shall be prescribed and become void three (3) years from the relevant due date for payment. The Issuer is entitled to any funds set aside for payments in respect of which the Noteholders' right to receive payment has been prescribed and has become void.
- 22.2 If a limitation period is duly interrupted in accordance with the Swedish Act on Limitations (*preskriptionslag (1981:130)*), a new limitation period of ten (10) years with respect to the right to receive repayment of the principal of the Notes, and of three (3) years with respect to receive payment of interest (excluding capitalised interest) will commence, in both cases calculated from the date of interruption of the limitation period, as such date is determined pursuant to the provisions of the Swedish Act on Limitations.

23. COMMUNICATIONS AND PRESS RELEASES

23.1 Communications

23.1.1 Any notice or other communication to be made under or in connection with the Finance Documents:

A Notice to the Noteholders shall also be published on the websites of the Issuer and the Agent.

23.1.2 Any notice or other communication made by one person to another under or in connection with the Finance Documents shall be sent by way of courier, personal delivery or letter, or, if between the Issuer and the Agent, by email, and will only be effective, in case of courier or personal delivery, when it has been left at the address specified in Clause 23.1.1, in case of letter, three (3) Business Days after being deposited postage prepaid in an envelope addressed to the address specified in Clause 23.1.1, or, in case of email, when received in readable form by the email recipient.

23.1.3 Any notice or other communication pursuant to the Finance Documents shall be in English. However, financial reports pursuant to Clause 11.1.1(a) and (b) may be in Swedish or English.

23.1.4 Failure to send a notice or other communication to a Noteholder or any defect in it shall not affect its sufficiency with respect to other Noteholders.

23.2 Press releases

23.2.1 Any notice that the Issuer or the Agent shall send to the Noteholders pursuant to Clauses 10.3 (*Voluntary total redemption (call option)*), 0 (*Early redemption due to illegality (call option)*), 11.1.3, 14.3, 16.2.1, 16.3.1, 16.4.13 and 17.3 shall also be published by way of press release by any of the Issuer or the Agent, as applicable.

23.2.2 In addition to Clause 23.2.1, if any information relating to the Notes or the Group contained in a notice the Agent may send to the Noteholders under these Terms and Conditions has not already been made public by way of a press release, the Agent shall before it sends such information to the Noteholders give the Issuer the opportunity to issue a press release containing such information. If the Issuer does not promptly issue a press release and the Agent considers it necessary to issue a press release containing such information before it can lawfully send a notice containing such information to the Noteholders, the Agent shall be entitled to issue such press release.

24. FORCE MAJEURE

24.1 Neither the Agent nor the Issuing Agent shall be held responsible for any damage arising out of any legal enactment, or any measure taken by a public authority, or war, strike, lockout, boycott, blockade, natural disaster, insurrection, civil commotion, terrorism or any other similar circumstance (a "**Force Majeure Event**"). The reservation in respect of strikes, lockouts, boycotts and blockades applies even if the Agent or the Issuing Agent itself takes such measures, or is subject to such measures.

24.2 Should a Force Majeure Event arise which prevents the Agent or the Issuing Agent from taking any action required to comply with these Terms and Conditions, such action may be postponed until the obstacle has been removed.

24.3 The provisions in this Clause 24 apply unless they are inconsistent with the provisions of the Financial Instruments Accounts Act which provisions shall take precedence.

25. GOVERNING LAW AND JURISDICTION

25.1 These Terms and Conditions, and any non-contractual obligations arising out of or in connection therewith, shall be governed by and construed in accordance with the laws of Sweden.

25.2 The Issuer submits to the non-exclusive jurisdiction of the City Court of Stockholm (*Stockholms tingsrätt*). The submission to the jurisdiction of the City Court of Stockholm shall however not limit the right of the Agent (or the Noteholders, as applicable) to take proceedings against the Issuer in any court which may otherwise exercise jurisdiction over the Issuer or any of its assets.
